# Entity Relationship Manager

Multiple views can be created by applying filters to the gold copy tree such as Party Type, Region, Shareholding Percent, and more

Gold Version + Filters = Custom Views

Your information can be arranged and rearranged for business relationship, ownership structure, by vendor or position, but underlying corporate ownership and legal hierarchies are protected

You are not limited to view only You Can Edit, Share, Print & Export!

These custom views can be printed or saved to an Excel file. These can also be shared with other users or systems

Included: An Integrated Legal Entity Relationship Set: Benchmark & Enhance Your Data
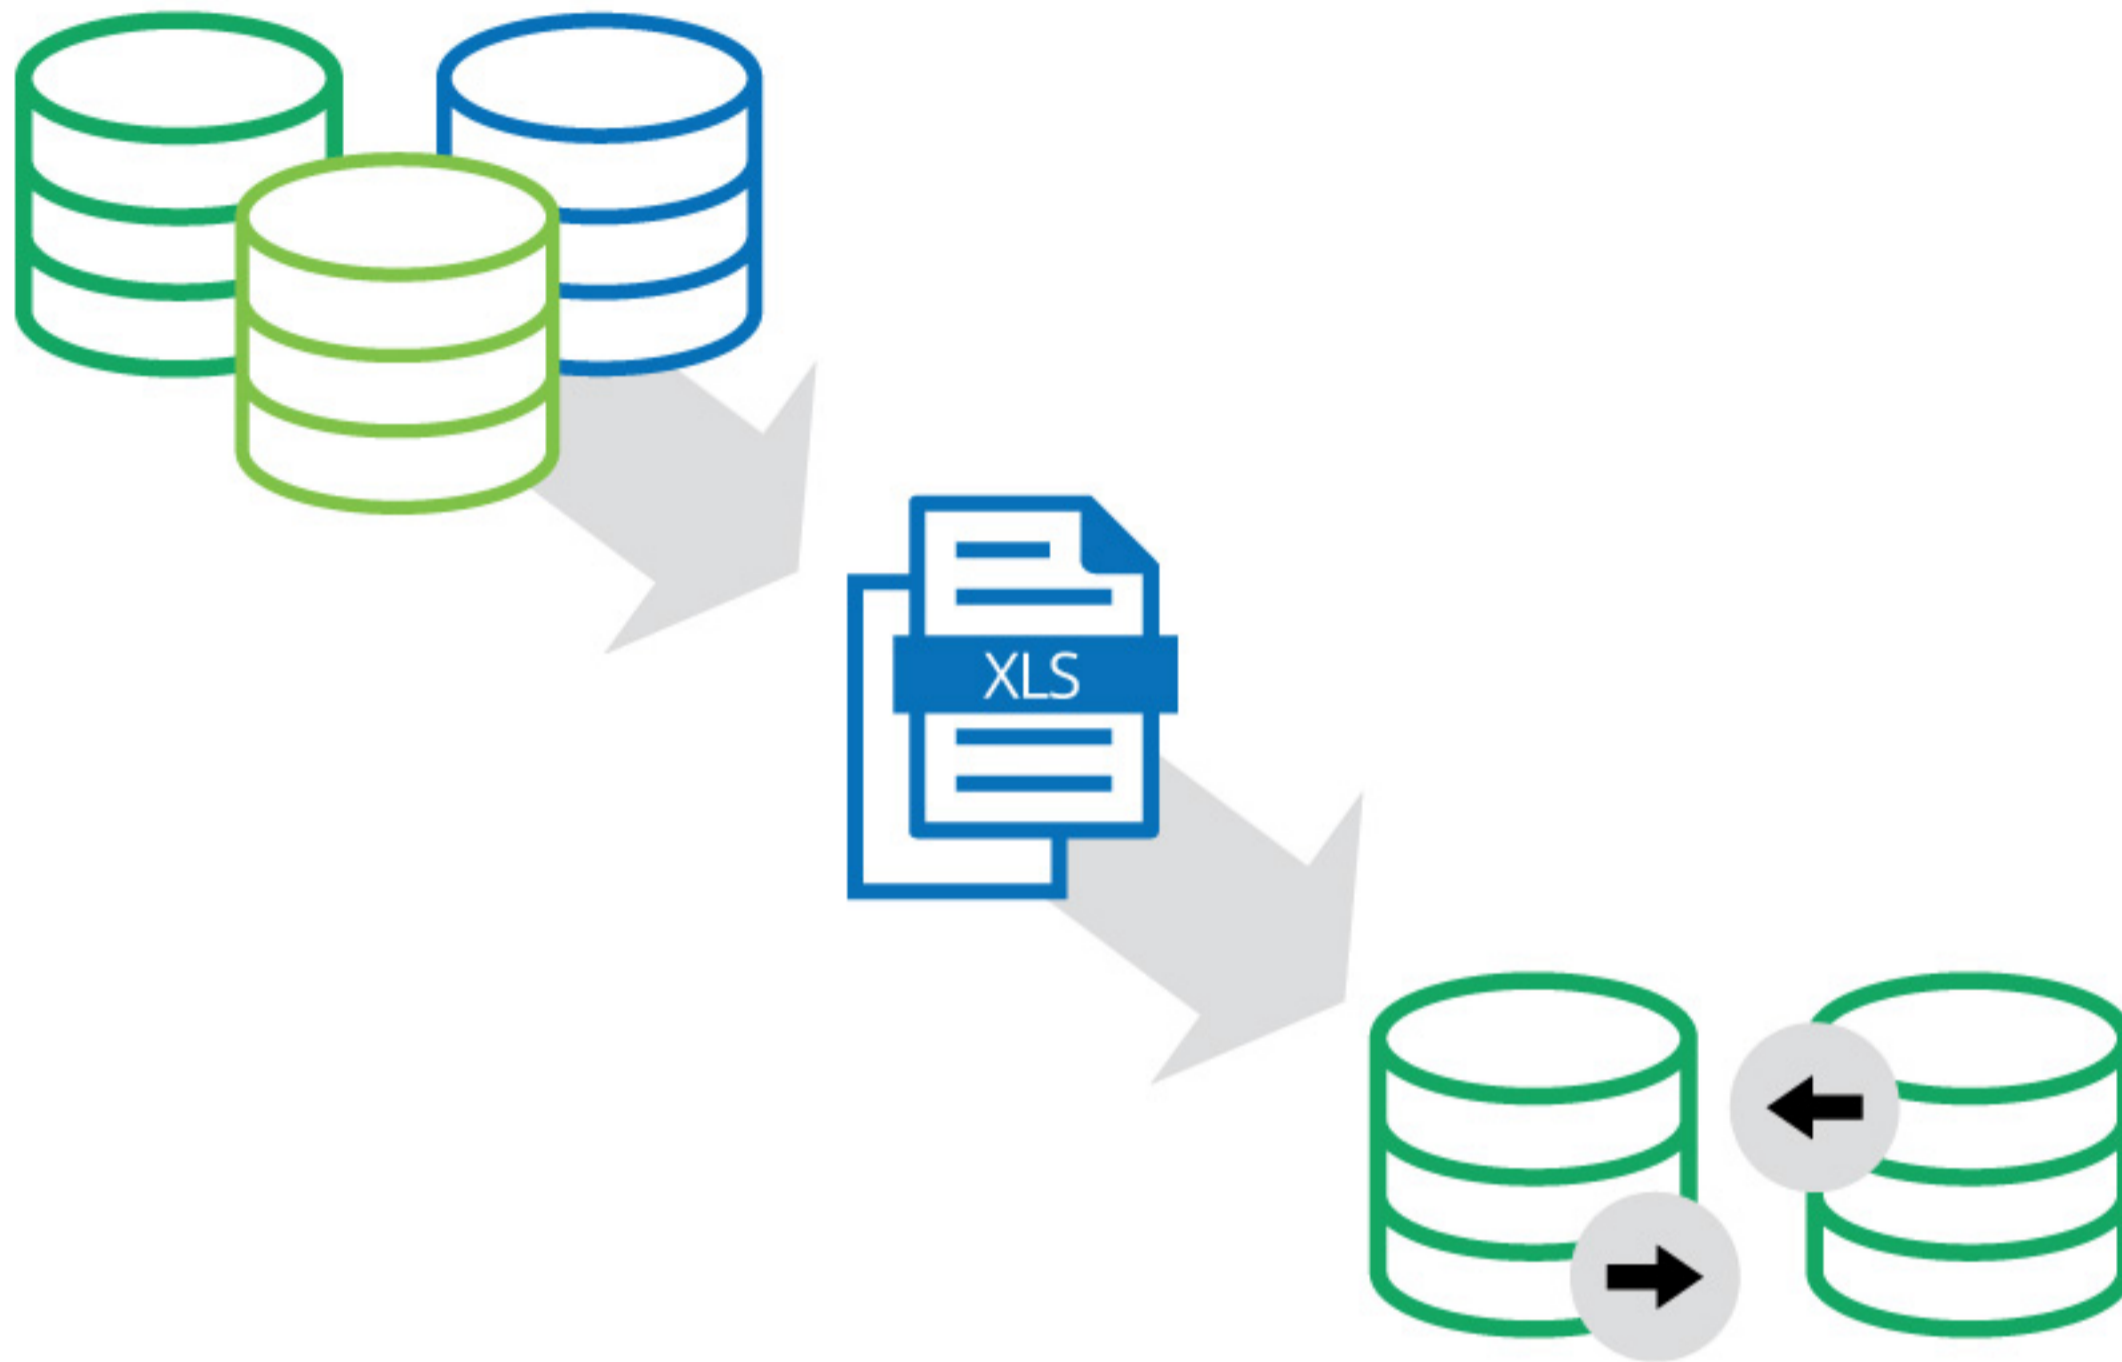

Leveraging our existing data knowledge in this industry will let you hit the ground with a rolling start.

Upload & Store Views From Multiple Sources

Different department, division, or decision partners can all access, analyze and ascribe their attributes and notes in the information for ease of integration. A text box offers flexible display options.

Auto Comparison allows Detailed Diagnostics

Two Hierarchy trees can be contrasted and "sized up" just by clicking the compare button. Within seconds, detailed reports are at the ready for mismatches, possible causes and suggestions.

XLS

Using standard file formats, data from multiple sources can be loaded into the data model for comparison and use

| **Entity connected to the wrong parent** | **Wrong entity name** | **Suggested entities** |
